

## Over 200 years of PFERD files: Brand products noted for superb quality!

Now as before, the oldest industrial metalworking tool is available from PFERD in unsurpassed world-renowned quality.

The benefits of these matchless file shapes and cut geometries are evident:

- High stock removal and long service life due to optimized tooth design, high dimensional precision, and uniform cut density and hardness
- Maximum abrasive action of half-round files due to spiral cut
- Sharpness of milled teeth and convex body of car body files ensure a top-grade surface finish
- PFERD ergonomic handle design offers secure and convenient grip
- Constantly high tool quality reduces cost of labour-consuming manual operations

PFERD files have remained an indispensable element of our comprehensive metalworking tool range for producing any surface grade from coarse to mirror-polished, as well as powerful cutting performance.
